Part-Time Biological Lab Technician

Environmental Consulting and Testing, Inc. (or ECT) is an aquatic toxicity testing laboratory and hatchery located in Superior, WI. We have over ten species of freshwater aquatic test organisms that we culture in-house. These organisms are used in our laboratory where we conduct many types of tests. We are looking for a part-time biological lab technician. We offer flexible hours during the school year and part to full time during the Summer.

**Job Summary:**
Regularly cultures organism and performs acute and chronic toxicity test.

**Essential Duties:**
- Regularly culture organisms for toxicity testing
- Perform acute and chronic aquatic toxicity tests on treated domestic wastewater, storm water, industrial effluents, and chemical products for clients
- Measured and recorded daily physical and chemical measurements of pH, D.O., conductivity, hardness, alkalinity, temperature and ammonia
- Carefully use laboratory equipment and instruments
- Detailed documentation of test results on worksheet or laboratory notebook.
- Communicate with other employees and managers
- Conduct procedures following SOPs and other methods
- Ensure the lab remains clean, and organized

**Minimum Requirements:**
- Need to be able to work a least 2-3 weekends a month (6-8 hours long per day)
- Need to be able to work 2-3 holidays a year
- Need to be able to work part-time during the week (10-30 hours)
- Need to be able to work part-time during the day in the week
- Biology or Chemistry Student
- Some college scientific lab experience and computer software would be helpful

**Prior Employment Experience:**
None

**How to apply:**
Send a letter of application or resume stating the courses you have had, when you would be available to work and where you can be reached.
